Aerotel to Present Mobile Health and Telemedicine Solutions at Mobile World Congress 2011

Bio-Medicine.Org

BARCELONA, Spain, Feb. 8, 2011 /PRNewswire/ -- Aerotel Medical Systems [1], a leading global supplier of advanced remote monitoring solutions for telehealth and telecare, will showcase its mobile health (mHealth) and other telemedicine solutions at the Mobile World Congress (MWC) 2011 [2] in Barcelona, Spain from February 14-17 at Hall 2, booth 2C12.

These low cost and flexible solutions are already helping healthcare providers around the world to reduce costs and improve level of care by providing significant benefits, including critical time savings, enhanced level of emergency treatment and quick recovery of patient in critical situations.

"The mobile health market is developing very fast as health care providers worldwide finally recognize that real-time mobile communication is a powerful tool in meeting the challenge of today's ailing healthcare system," said David Rubin, Aerotel Medical Systems president and CEO. "This understanding contributes to the growing interest in Aerotel products which use existing wireless networks and are both safe and easy to use for both medical teams and for the patients themselves."

The main innovations to be presented by Aerotel in Hall 2, booth 2C12 (Israel National Pavilion) include:

Wireless homecare hub [3] -- Connect-Cell™ is a highly flexible wireless homecare hub for chronic patient monitoring and disease management, enabling users to easily transmit vital signs data via the cellular network (GPRS) to a central monitoring center.

Wireless ECG [4] -- Aerotel's HeartView™ Personal hand-held 12-lead ECG monitor with Bluetooth® connectivity. The solution enables ea
