About Us:

Welcome to NuSil, a global manufacturer of silicone-based materials for the healthcare, aerospace, electronics, and photonics industries and your vital partner in the materials world.

Since our founding in 1979, NuSil has focused exclusively on silicone technology and related process development. The company comprises hundreds of research, manufacturing and engineering professionals, perfecting silicone as the material of choice based upon its vast array of unique applications. Whether your challenge requires large or small quantities, we promise accurate, custom formulations and the most complete line of silicone materials available.

NuSil is a leading formulator of silicone compounds for aerospace, healthcare, electronics and other applications requiring precise and predictable materials performance. ISO 9001-certified since 1994, NuSil operates state-of-the-art laboratories and processing facilities in North America. Our global presence is represented by experienced application specialists and stocking distributors based in Northern Europe, Pan-Pacific and the Middle East. Internally, NuSil employs more than 600 personnel worldwide and specializes in providing on-site, in-person application engineering support.

All materials are either developed or qualified in our own laboratories, under our global R&D and quality standards. With each facility being ISO 9001-certified, we sure consistent processes and standards around the globe for seamless transitions from R&D developments to full-scale production.
