About Us:

Connector solutions for over 70 years

For over seventy years ODU has provided connector solutions to the international market. With global manufacturing, sales and marketing offices, and technical

support in every industrialized region of the world, ODU has become a leader in high-quality interconnect products.

Certified quality

ODU is ISO 9001 and QS 9000 certified. All critical manufacturing processes are performed in house. This includes tools and dies, molds, electro-plating, precision stamping, wire-erosion, turning and milling, and automated assembly.

Additionally, ODU performs Failure Modes and Effects Analysis (FEMA) and Design for Assembly (DFA) tests that serve to maintain the highest quality standards in connector manufacturing.

A wide range of connectors

ODU offers a wide range of connector products including:

- Medical and military grade cylindrical push-pull connectors that mate with LEMO * and W.W. Fischer ** connectors
- Heavy-duty cylindrical industrial power connectors
- Modular rectangular connectors with signal, coax, power, fiberoptic and pneumatic connections
- Highly reliable single contact connectors with springwires or stamped contact bands
- Surfacemount and IDC connectors for PCB applications
- Custom, application-specific connectors and cable assemblies

Cable assemblies

While developing innovative connector systems, ODU has taken on the various tasks involved in integrating connectors and cables. This can involve: soldering to PCB or wire, crimping, extruding and over molding. Whatever your requirements may be, ODU has a solution for your custom cable assembly needs.
