DrChrono.com iPad EMR Unveils Electronic Prescription Feature

Bio-Medicine.Org

NEW YORK, Aug. 19 /PRNewswire/ -- DrChrono.com [1], the premier publisher of dynamic point-of-care and practice management software, today announced the latest version of its signature iPad EMR platform [2], which offers electronic prescribing (eRx).

"Studies have shown that eRx cuts down errors resulting from misinterpreted handwriting by more than 70 percent in even the best cases," noted DrChrono.com [1] CEO and Co-Founder Michael Nusimow. "It is also an essential part of The U.S. Centers for Medicare and Medicaid Services' final rule on EMR meaningful use."

As of December 2009, 85% of all pharmacies in the U.S. accept electronic prescriptions. The DrChrono.com EMR [2] is the first eRx system available for the iPad.

"The DrChrono.com [1] eRx module includes a modifiable active medication list that includes the specific prescription information for all current medications for a given patient," reported Dr. Matt Krasucki, DrChrono.com [1] Senior Medical Advisor. It also features an active medication allergy list, and a warning system that alerts users if a prescription poses an allergy risk, or for example, if it is incompatible with an existing medication.

The new version also includes a feature for storing and displaying scanned documents and lab reports.

DrChrono.com [1] offers the world's first and most robust native EMR platform [2] for the Apple iPad, which was created with the intention of improving the patient/doctor experience. DrChrono.com [1] has been featured in local, national and international news outlet
