Business & Decision North America Announces the Successful Go-Live of Microsoft Dynamics AX at DeVilbiss Healthcare

Bio-Medicine.Org

WAYNE, Pa., Sept. 9 /PRNewswire/ -- DeVilbiss Healthcare has selected Business & Decision, following a thorough selection process, to ensure the successful implementation of its Microsoft Dynamics AX solution.

As part of the separation from Sunrise Medical, DeVilbiss sought to select and implement a global solution well suited to the needs of a successful medical device manufacturer.

The primary reasons for choosing Dynamics AX were its complete suite of functionality that covered everything from manufacturing through to international financial consolidation; the compelling benefits of the total MS technology stack; the inherent flexibility within the AX platform.

During the analysis of DeVilbiss' needs and the subsequent proposition of the Microsoft solution, Business & Decision played a vital advisory role and demonstrated the business understanding and insights that DeVilbiss felt made B&D the right choice to implement the solution.

Steve Amelio, CFO at DeVilbiss comments, "*The implementation project was such a great success due to the close collaboration between DeVilbiss and B&D. Both sides brought their top talent to the table and the teams worked tirelessly to achieve the goals.*"

Going live in the timeline planned allowed DeVilbiss to end its dependency on existing systems and to begin to operate as a completely independent entity. Not only did the implementation project go live according to plan, but DeVilbiss has already begun to see business process improvements.

Continuing, Amelio comments, "*Selecting the right systems integrator that could support its strategic global business initiatives and that would enable a quick start-up as an independent business, meant that B&D was an excellent fit.*"

About DeVilbiss

DeVilbiss Healthcare is a world leader in the design, manufacture, and marketing of medical products that address the respiratory needs of p
