BioInformatics, LLC New Market Reports - RNAi, Genomics and Membrane Protein Structure

Bio-Medicine.Org

ARLINGTON, Va., Oct. 14 /PRNewswire/ -- BioInformatics, LLC announces the pending release of three Q4 market reports:

RNAi: Product Usage & Brand Assessment (#10-006)Exploring Structural Biology: Tools & Techniques Used in the Study of Membrane Protein Structure (#10-004)Genomic Technologies: Market Insights for Life Science Suppliers (#10-005)**In an effort to support suppliers who provide product and services to these three rapidly growing markets, BioInformatics is publishing three titles in the fourth quarter of 2010. Given the accelerated changes in each of these technologies, these three reports provide suppliers up-to-date primary research that identifies trends, planned expenditures and anticipated growth.**

RNAi: Product Usage & Brand Assessment (#10-006)**Scheduled for release on October 15, 2010, this report will provide market insights and analysis to suppliers of products and services that support RNAi experiments. By using this report, RNAi product suppliers will gain an understanding of where scientists predict the future of RNAi technologies is headed so as to better anticipate current and upcoming RNAi product needs.**

In this report, scientists indicate planned instrument and consumable purchases by vendor. The following suppliers were provided as some of the choices in the survey:

Abnova

Affymetrix (NASDAQ: AFFX)

Agilent Technologies (NYSE: A)

Ambion

B-Bridge

Bioneer

Biosettia

Bio-Rad (NYSE: BIO)

Cellecta

Cell Signaling Technology

Clontech

Dharmacon

EMD Millipore

Eurofins MWG Operon

Exiqon

GeneCopoeia

Genosensor

Hamilton Life Science Robotics

Imgenex

ImaGenes

Integrated DNA Technologies

InvivoGen

LC Sciences

Life Technologies (NasdaqGS: LIFE)

Luminex (NASDAQ: LMNX)
