Revolutionary "Anti-Aging" Compound Touted by Dr. Oz

Bio-Medicine.Org

NEW YORK, Nov. 16, 2012 /PRNewswire/ -- A recent Dr. Oz segment has people scrambling to get their hands on the new human growth hormone-boosting product SeroVital™-hgh, and its manufacturer, SanMedica International™, is scrambling to keep it in stock. "We're thrilled with the response we've gotten since the Dr. Oz show aired," says Chantelle Daines, Media Consultant for SanMedica. "We just hope customers will accept our sincere apologies for the shortages and continue to be patient as we ramp up production."

Dr. Oz started this frenzy when he did a segment on human growth hormone (HGH), saying it is "fundamentally important to us staying youthful and vital." Indeed, HGH has been touted to reduce wrinkles, boost energy, decrease body fat, recharge sex drive and make people look and feel decades — not years, but decades — younger.

Until recently, the only proven way of increasing HGH levels in the body was through the use of expensive prescription injections. But Dr. Oz revealed to his audience, "Now there's a new frontier: stimulating your body's production of growth hormones naturally with amino acids," and later added, "I have been searching for this from the day we started the show. I've been looking for ways of increasing HGH naturally because I don't like getting the injections."

Dr. Oz was referring to the research behind SeroVital-hgh, an oral amino acid compound clinically proven to increase bioactive, serum (blood) growth hormone levels by a mean of 682%. And although Dr. Oz doesn't endorse any product, his enthusiasm for SeroVital's research, which he referenced not once but twice during the segment, has really gotten people excited.

Of course, some skeptics are saying SeroVital sounds too good to be true. So is there a catch? Well, according to Ms. Daines there are actually three. She says, "First, as with HGH injections, SeroVital-hgh is not a 'magic bullet' but one part of a healthy l
