'Advancements in GYN Oncology; Instrumentation and Techniques' to be Presented by Nicholas C. Lambrou, M.D. of Miami

Bio-Medicine.Org

MIAMI, March 16, 2011 /PRNewswire/ -- Nicholas C. Lambrou, M.D., FACOG, of Miami Gynecologic Oncology, will present a seminar focusing on the latest advancements in robotic assisted gynecologic oncology surgery with David Kushner, MD, of the University of Wisconsin School of Medicine.

Dr. Lambrou will present to surgeons and surgeon's assistants about minimally invasive procedures performed laparoscopically and robot assisted. His unique operative technique utilizes the latest technology in laparoscopic tissue sealing in combination with robotic-assisted surgical dissection, minimizing blood loss and improving operative efficiency and precision.

The one-day seminar will be held in Cincinnati on March 29th at the Endo-Surgery Institute. It will enable the Gynecologic Oncologist with opportunities to engage in discussions regarding the latest advances in laparoscopic and robot assisted surgery.

The agenda will include:

- Science of Advanced Energy
- Advanced Energy Lab
- Laparoscopic Gynecological Oncology Procedures
- Robot- assisted Gynecological Oncology Procedures with Advanced Energy Modalities
- Role of the First Assistant
- Next Generation Product Development
- Economics and Healthcare Reform
- Hands-on Animate Lab
- Next Steps in the Learning Journey

A leading daVinci robotic assisted surgeon, Dr. Lambrou, was one of the first gynecologic oncologists to be trained in 2006. Since that time, he has performed over 1000 surgeries and has become a widely recognized expert in robotic gynecologic surgery. His specialty includes both surgical and chemotherapy expertise in treating women with gynecologic cancers and is considered a world expert in robotic surgery utilizing the daVinci system.

For more information about Dr. Lambrou, he can be reached in Miami, Florida at (305) 430-6969, or to register for the seminar please call your l
