At SIIM 2011 Siemens Showcases Imaging IT Solutions for Driving Greater Value in Radiology and Other Specialties

Bio-Medicine.Org

WASHINGTON, June 2, 2011 /PRNewswire/ -- **Siemens Healthcare** (NYSE: SI) **will showcase its portfolio of imaging information technology (IT) and workflow management solutions at the Society for Imaging Informatics in Medicine (SIIM) 2011 Annual Meeting from June 2-5, 2011, (booth 825) in the Gaylord National Resort and Convention Center, Washington, D.C. Across the country, radiologists are facing increased pressure to provide faster, more accurate diagnoses for patients; higher value with greater coverage for referring physicians; and simpler tools that put more information and capabilities at their fingertips — making them more productive. These challenges can be satisfied in large part by turning to Siemens *syngo* solutions for image management and advanced visualization.**

The imaging IT solutions on display at SIIM include advanced visualization to help share information with colleagues and clinical partners across the healthcare enterprise; picture archiving and communications system (PACS) that converges 2D, 3D and 4D imaging in one location; an enterprise radiology information system (RIS) with business intelligence, workflow management and critical results management tools; private cloud-based disaster recovery, and new mobile and Web-based image and report distribution.

***syngo*®.via**(1) for advanced visualization, providing innovative and highly sophisticated 2D, 3D and 4D multimodality visualization of clinical cases. It features a thin-client/server architecture, making it easier to access information anywhere(2), from any modality(2), and share that information with colleagues and clinical partners across the enterprise, enabling improved quality in patient care.

Siemens will also showcase *syngo*.via Web Options, which provides image access from anywhere(2), securely, even from outside the
