In 2010, the Chinese dental imaging market was valued at over CNY 717 million. The market was dominated by analog X-ray image capture in 2010, but digital imaging is gaining popularity and is expected to capture significant market share over the forecast period.

Dental imaging is segmented into:

- Intraoral X-ray market:

- Which includes photostimulable phosphorus (PSP) systems and digital sensors

- The extraoral X-ray market:

- Which includes panoramic and panoramic/cephalometric X-ray systems;

- And cone beam computed tomography (CBCT) scanners

The fastest-growing segment in the Chinese dental extraoral X-ray market is CBCT scanners. This segment is expected to nearly double in market value over the forecast period. This report provides a comprehensive and detailed analysis of market revenues by device type, market forecasts through 2017, unit sales, average selling prices, market drivers and limiters and a detailed competitive analysis, including manufacturer market sha
