New Arrivals of Special Thermometers for Babies & Elderly

Bio-Medicine.Org

SHENZHEN, China, Aug. 1, 2011 /PRNewswire-Asia/--In recent years, both people's need to be healthy and expense in health care keep increasing, while the improvement of their self-awareness and increase of economic conditions promotes the demand for healthcare products. Shenzhen Wuzhou Changlian International Trading Co., a leading developer, manufacturer and distributor of medical equipments and exercise products, can offer such portable healthcare [1] products to add to convenience of diagnosis, or relieve patients.

There are always two main categories for portable medical products, one for home use and the other for hospital use. Among home categories, it contains usually infrared thermometers [1], blood glucose monitors and blood pressure monitors. With the further development for community and country medical service and equipments, portable electronics market keeps growing fast and stably. 'Fortune' lines family medical equipments as the most rapidly growing industry in following 10 years, believe with the pace for modernization, there will be great potential for country portable electronics market, it is not impossible for each family to own one or several kinds of healthcare products.

Another of several reasons for the quick development of portable medical products includes high cost for seeing a doctor in a hospital, most of these products can act as a prevention for diseases and even can heal the illness, what's more, many people are in a sub-health [1] status or with chronic diseases and don't have the time to heal in a hospital. In addition, such home medical electronics are quite useful for the elderly and babies. Such as an infrared thermometer [1], it can offer an accurate reading of temperature in seconds. When an individual cannot express their illness, with the
