WinterGreen Research announces that it has a new study on Portable and Transport Ventilator: Market Strategies, Shares, and Forecasts, Worldwide, 2010-2016. Portable ventilators create ways to treat patients with respiratory disease more efficiently. The study has 281 pages and 127 tables and figures.

New portable ventilators have revolutionized the ventilator market, creating units that work across the board in hospital and home situations. This evolution of the portable ventilators means that clinicians have more flexibility of care decisions, moving people home on the same ventilator used in the hospital even without weaning.

Studies have shown that ventilated patients are not a profit center for the hospital, creating incentive for hospitals to move ventilated patients into alternate care delivery settings. As ventilators become smaller, more powerful, and smarter, portable ventilators have become the treatment modality of choice in many cases.

The EnVe™ Ventilator from CareFusion is an example of a comprehensive, full featured pediatric - adult critical care ventilator. The patented ActivCore™ gas delivery system with unprecedented miniaturization allows a single ventilator to delive
