Wilshire Dental Care is Offering Advanced Dental Implant Options for Tooth Replacement

The Associated Press

Tooth loss is a serious condition that affects countless individuals of all ages every single year. Those that do not have a whole and complete smile will not only need treatments in order to restore the appearance of their teeth, they will also need dental solutions that will allow them to once again eat and speak with confidence and comfort. While these types of situations are devastating and may even feel hopeless, there is one Los Angeles dentist that is now offering comprehensive and affordable solutions for those that would like to reinvent their smile.

One of the most common reasons for tooth loss is when a patient goes on for too long with undiagnosed and untreated gum disease and tooth decay. These health conditions are extremely common and often the result of plaque and tartar buildup within the mouth. Over time, the teeth will slowly begin to pull away from the sockets in the jaw as the gums deteriorate. Other common causes for tooth loss include damage to the roots of the teeth sports accidents, and diseased pulp.

Whatever the reasons may be, many patients are now finding the solutions that they need at Wilshire Dental Care.

The multi-specialty team at Wilshire Dental Care has created a world-class reputation by offering some of the most advanced, affordable, and effective dental services in the world. This includes the use of dental implants and other appliances in order to quickly restore a smile. Their Los Angeles teeth whitening specialist also provides a wide range of treatment options for those that would like to quickly boost their appearance including Lumineers, Zoom whitening, and Invisalign aligners.

About Dr. Afar, LA Dentist Dr. Bijan Afar and the rest of the dental specialists at Wilshire Dental Care have created loyal and happy patients due to the amazing services and comfortable atmosphere that they offer. All locals can find the treatments that they need including biannual checkups, implants, dentures, bridges, teeth whitening, teeth cleaning, porcelain veneers, and more.
