GlobTek Gains Multiple ISO Certifications

Continuing to pursue its commitment to quality products and service, GlobTek, a world-class provider of power supplies and power electronic solutions, has renewed its ISO9001:2008 [1] certification as well as certification for ISO13485:2003 [2] and ISO14001:2004 [3]. ISO9001:2008 is for Quality Management System Certification, ISO13485:2003 for Medical Devices Quality Management System Certification, and ISO14001:2004 is for Environmental Management System Certification.

As pointed out by David Rakovsky, COO of GlobTek, "Generally I think it's imperative for a supplier of power supplies to some of the world's largest and most critical medical device manufacturers to establish a trust in quality and maintain it to the highest levels. While GlobTek always maintained a commitment to quality, our recent certifications reinforce that and show our level of commitment." David concluded, "Aside from our commitment to quality, I think it also shows to customers that we are familiar with and able to communicate on the highest levels of quality in case an issue does come up."

GlobTek is a power systems solutions provider with design and manufacturing facilities in the USA and China and sales offices in Germany, France, and the UK. Offering a line of power supplies for applications from gym equipment to medical systems, GlobTek can also develop and create custom power solutions for just about any application. GlobTek is located at 186 Veterans Drive, Northvale NJ 07647. For more information call 201-784-1000 or visit GlobTek online at www.globtek.com [4].
