Precision Automation Expert DWFritz Automation Announces Website Launch www.DWFritz.com

Bio-Medicine.Org

TUALATIN, Ore., Aug. 21, 2012 /PRNewswire/ -- DWFritz Automation Inc., headquartered in Tualatin, Ore., today announced the launch of its new website at www.DWFritz.com [1]. The upgraded DWFritz website features a new corporate video, corporate brochure and news section that includes the DWFritz corporate blog [2]. The blog keeps customers and industry followers up to date on what's happening with DWFritz and features DWFritz' precision engineering in action, including videos of its core areas of expertise in sub-micron metrology, dispensing, high-speed/high-precision assembly, micron fastener insertion and inspection. The website also includes active links to social media presence on Facebook and YouTube.

DWFritz Automation Engineers Brilliant Systems to Solve Difficult Challenges
DWFritz provides engineered-to-order automation systems for advanced manufacturing in precision inspection & assembly equipment using intelligent motion control, vision and robotics. The company designs, integrates, and manufactures systems scalable from custom one-off projects to standardized machines in the hundreds.

"I think DWFritz is unique because we tackle the most sophisticated and difficult automation problems. I am always impressed by the creativity and knowhow that our team applies to the tough challenges. Our engineering staff averages 20+ years' experience and the clever application of this knowledge never fails to deliver elegant solutions and robust designs." said Dennis Fritz, Founder and CEO. "How do we know this? Our clients tell us. When you partner with us, we will own your problem - plain and simple."

DWFritz has a growing global footprint with an impressive portfolio of clients and industries served, including many Fortune 500 clients and emerging companies in consumer electronics, semiconductor, infrastructure, medical device manu
