It is estimated that cardiovascular diseases are the largest cause of deaths globally - around 17.3 million people died from cardiovascular diseases (CVD) in 2008. This amounts to about 32.8% of all deaths. Of these deaths, an estimated 7.3 million were due to coronary heart disease and 6.2 million were due to stroke. The number of total deaths due to cardiovascular diseases is expected to rise to 18.3 million in 2012 and 20.5 million by 2020. Low - and middle-income countries are the largest affected with CVDs. An estimated 80% of CVD deaths take place in these low- and middle-income countries. By 2030, almost 23.6 million people will die from CVDs, mainly from heart disease and stroke, projected to be the single leading causes of death.

The growth in cardiovascular fatalities, increasing number of cardiovascular cases, g
