Medical Murray, Inc. Opens New Design and Development Facility in Charlotte, NC

Medical Murray

Medical Murray proudly announces the opening of its new design and development facility located in Charlotte, North Carolina.

“We are excited to move forward with our plans to open a new Charlotte facility, which will allow us to better service our new and existing customers in the Southeast and Mid-Atlantic,” said Phillip Leopold, President of Medical Murray. “Similar to both of our Chicago-area facilities, our new Charlotte facility will focus on total customer satisfaction by providing intricate medical solutions at all phases of the design, development, and regulatory process.”

The new facility will be located in Mecklenburg County at CLT Logistics Center, 3400 International Airport Drive, Charlotte. The company is conveniently located near the Charlotte Douglas International Airport, and is expected to be fully functional by March, 2013.

Tanner Hargens, Regional Vice President, will head the new 4,000 square foot operation, supporting sales, design and development activities. Hargens has been actively engaged in medical device engineering including research, design and development for over eight years. He specializes in implants, biomaterials, and minimally invasive procedures and also provides expertise related to commercializing medical products including patent protection and regulatory strategizing.

“Our mission is to increase our support of the medical community and the need for highly complex device requirements from concept to production,” said Hargens. “This operation will allow us to further embrace new and existing customers in the Southeast and Mid-Atlantic, and continue to advance the betterment of patient care.”

About Medical Murray
Founded in 1996, Medical Murray is a global medical technology innovator specializing in designing, developing, and contract manufacturing unique complex catheter systems, permanent implants, and bioabsorbables for less invasive vascular, urologic and surgical applications. Their nano-molding capabilities feature patented molding technology of parts weighing less than 1 gram. Medical Murray also offers contract manufacturing facilities featuring four ISO 13485 class 7 clean rooms, and FDA registration to handle full sterilization, packaging, and final distribution needs. The company headquarters are located in North Barrington, IL.
