Cogmedix Provides Medical Device Storage and Order Fulfillment Services for Telcare Medical Supply

Bio-Medicine.Org

WORCESTER, Mass., March 15, 2012 /PRNewswire/ -- Continuing to meet the complex needs of medical device companies, Cogmedix [1], a US-based, ISO13485-certified, FDA compliant contract manufacturing and services company, will provide Massachusetts-based Telcare Medical Supply with FDA compliant storage and order fulfillment services for their Class II medical device, Telcare BGM.

Telcare's FDA and HIPAA-compliant solution, Telcare BGM, is the world's first cellular-enabled glucose meter. Paired with Telcare's back-end clinical server and a suite of smartphone applications, the Telcare BGM™ blood glucose meter provides a complete ecosystem of care. Telcare's FDA-cleared HIPAA-compliant server connects directly to electronic medical record systems and is accessible via a secure, online portal where users and their caregivers can monitor current and historical readings, set up messaging options delivered directly to the meter, adjust personalized blood glucose target zones, and print reports.

"Telcare will leverage the Cogmedix team's flexibility and compliance expertise, while taking advantage of the company's controlled inventory management with environmental monitoring," said David Bjork, President of Telcare Medical Systems. "Working with Cogmedix offers us the flexibility to deploy our own inventory management software at their facility, while enabling the Cogmedix team to be a seamless extension of our business management processes."

"While Cogmedix can expertly manage the entire medical device manufacturing and fulfillment process, we are also happy to partner with companies like Telcare that require a subset of our expertise for various stages of their outsourcing strategy," said Matt Giza, General Manager, Cogmedix. "O
