Through the development of Mobile MIM and other new technologies, MIM Software™ has achieved distinction in the medical imaging field and is influential in initiating and driving market standards. Mobile MIM was the first FDA-cleared medical imaging app for the iPad® and iPhone® and provides remote diagnostic viewing of CT, PET, MRI, SPECT, ultrasound, and X-ray, as well as radiation therapy treatment plan review and approval.

Mobile MIM was designed to equip physicians with diagnostic tools for remote consultation with peers, specialists, and referring physicians. The accessibility provided by Mobile MIM can limit redundant and unnecessary imaging procedures across facilities and simplify communication between caregivers to provide the best possible patient care. The app was included in the Apple App Store Rewind for best Medical Software in 2011, and was named Best New Radiology Software by AuntMinnie.com the same year.
