About Us:

Hotwatt, established in 1952, a leader in manufacturing resistance heating elements for 60 years, began with the manufacturing of one product, the open coil heating element. Since then Hotwatt has expanded our product line to include cartridge, air process, immersion, strip and finned strip, tubular and finned tubular, band, foil, flexible glasrope®, crankcase and ceramic heaters. We have evolved from a large supplier of the appliance industry to become a quality supplier to a variety of OEM's in the industrial, medical, commercial, packaging, Instrumentation, Aviation, Transportation and Military fields. In addition, we can supply compatible accessory items, which enable us to offer a complete heater system.

Our Technical Information section will help you to find your wattage requirements as well as suggested watt densities. You will also find installation suggestions, ohms law, wiring diagrams and most everything you will need to find the correct heater for your application.

In addition, we can supply compatible accessory items which enable us to offer a complete heater system.
