About Us:

PhotoMachining, Inc. is the world leader in the innovative technology that makes precision laser micromachining of otherwise unmachinable parts and materials a routine job. We proudly bring together the most skillful, experienced and talented people in the industry to design, build and operate our laser systems. We are constantly striving to better serve our customers. Lasers are the most versatile, flexible, precise and powerful tools in manufacturing. PhotoMachining is the leader in supplying high precision laser micromachining services and systems to the medical, aerospace, display, microelectronics and other industries. Speeds of up to several hundred features per second can be achieved using high speed laser drilling techniques coupled with fast, smart software to control the process and a unique diversity of laser sources to tackle almost any material.

We offer solutions based on a modern cutting edge technology meeting both the customer's technical requirements and budget. Our goal is to exceed expectations! Whatever you need: turn-key laser systems for in-house operation custom jobs demanding the highest precision and tolerances on a micron scale precise micromachining or marking of tough, fragile, or exotic materials low or high volume processing of parts long-term contract manufacturing application related R&D Our experts will find the solution that is right for you!
