

## April 2013 Digital Edition

[1] Given the number of

device applications that involve the transfer of a gas or liquid, it is no wonder pump technology is such a significant part of many healthcare-related products.

“[Innovation Drives Pump Technology to Meet Today’s Medical Designs](#) [2]” focuses on how today’s medical device demands are being answered by advanced pump technology.

“[Pressure Balanced Proportional Valve Options](#) [3]” looks at micro valve technology in portable medical device instrumentation that is getting smaller and being made to be portable.

When the sealing of O-rings inside of a component to a blood diagnostic device was resulting in leaks, a simulation service was used to determine how to best make the necessary modifications for a successful result in “[Simulating Solutions for Molding Challenges](#) [4].”

“[Portability Is the Name of the Game](#) [5]” in this month’s Roundtable feature that highlights medical electronics.
