

The MassDevice Weekly Checkup: June 15, 2010

Mass Device

Our **Weekly Checkup** takes the temperature of the medical device industry's three largest U.S. clusters: Massachusetts, California and Minnesota.

The MassDevice Indices are weighted according to market capitalization, based on the number of shares outstanding for each company and each Friday's closing share price.

The Massachusetts index for the week ended June 11 closed at 5.78, up 0.6 percent compared with the prior week. Since Jan. 1, 2009, when we began tracking these companies, the index has risen 30.6 percent.

The Minnesota index for the week ended June 11 closed at 3.59, up 0.8 percent compared with the prior week. Since Jan. 1, 2009, when we began tracking these companies, the index has risen 21.6 percent.

The California index for the week ended June 11 closed at 9.01, up 3.1 percent compared with the prior week. Since Jan. 1, 2009, when we began tracking these companies, the index has risen 112.4 percent.

We also create a composite index of the three regional indices and compare it with
