

## **&lt;i&gt;Blog: &lt;/i&gt;Ozzy Osbourne's DNA, way beyond the need to know**

Mass High Tech: The Journal of New England Technology

It's the technology equivalent of the old line, "You don't really want to know how the sausages are made."

[Knome](#) [1] Inc., the Cambridge genomics company, completed a sequencing of Ozzy Osbourne's genome. OK, we're sure he can afford it. Now, Ozzy and Sharon plan to reveal the results of his test, first in a column that he writes for the London Times and then in a presentation at the TEDMED Conference in San Diego.
