

BioDrain Medical, Inc. Completes Installation of Its Streamway™ Automated Surgical Fluid Disposal System in Minnesota Hospital

Bio-Medicine.Org

MINNEAPOLIS, March 29, 2011 /PRNewswire/ -- BioDrain Medical, Inc. (OTC Bulletin Board: [BIOR](#) [1]), producer of the FDA cleared Streamway™ System for automated surgical fluid disposal, announced today that it has completed the installation of its patented Streamway™ System in a large Minnesota Hospital. The hospital has now completed several procedures utilizing the Streamway System and the clinical benefits, user friendliness and efficiency aspects of the System have already been acknowledged.

The Streamway™ System received FDA clearance in April of 2009 and has since been run in over 100 live operations as part of the Company's product launch phase. As the system has been increasingly tested and used by various healthcare facilities, it has proven to offer a more effective and economical means for safely disposing potentially infectious fluids in operating rooms.

"Due to the rapidly increasing market need for enhanced safety and compliance to Occupational Safety and Health Administration (OSHA) standards in the operating room, more and more hospitals are now leaning towards our innovative solutions to efficiently update their facilities," said Kevin Davidson, President of BioDrain Medical. He continued, "We are extremely excited about the installation in this Minnesota hospital and look forward to additional opportunities that may develop from this and other new relationships."

About BioDrain Medical, Inc.

BioDrain Medical, Inc. has a fully automated, patented, FDA cleared, surgical fluid management system that virtually eliminates operating room workers' exposure to blood, irrigation fluid and the related germs, viruses and diseases that are potentially found in the surgical environment. Today's manual surgical fluid handling methods of hand-carrying filled surgical fluid canisters and emptying these canis
