

Los Angeles Dentist, Dr. Kevin Sands, Uses the Latest Technologies to Provide VIP Services and Treatments for His Patients

Bio-Medicine.Org

LOS ANGELES, March 14, 2011 /PRNewswire/ -- [Cosmetic dentist in Los Angeles](#) [1], Dr. Kevin B. Sands, DDS, is used to taking care of the oral health of superstars and celebrities around the world. Celebrities require a certain level of trust and acknowledgement and the dental practice of Dr. Sands delivers every time. Dr. Sands has implemented the latest technological advances in his office and all patients receive VIP treatment upon arrival for general and cosmetic dental procedures.

Dental exams are used to provide a look into the current oral health of a patient and any underlying problems that can become much larger problems if not detected and treated. Dr. Sands uses digital imaging technology to provide an in-depth look at the oral health of a patient and designs treatments for correction and restoration. The use of lasers to provide laser surgeries and laser care for gum disease are standard procedures with [Los Angeles dentist](#) [2], Dr. Sands.

Dr. Sands provides a safe and comfortable atmosphere for his patients. High speed light curing is used to complete procedures in a faster period of time compared to traditional dental treatments. Dr. Sands uses Nitrous Oxide to help calm patients that may experience anxiety or phobias during dental treatments.

Traditional dental treatments are not exciting or memorable in theory. The use of modern technology is changing this mindset. Patients that visit Dr. Sands, [dentist in Los Angeles](#) [2], can enjoy the latest DVDs on flat screen TVs. The implementation of massage therapy is another one of the many VIP services available and the reason why celebrities keep Dr. Sands on speed dial.
