

## **SpaceClaim Engineer 2010 Chosen as a Best Product in Design Tools**

The Associated Press

<http://www.spaceclaim.com> () —

SpaceClaim (<http://www.spaceclaim.com/>) , the leader in direct modeling software that enables all engineers to work in 3D, today announced that it has won a Design News Golden Mousetrap Award for product innovation and creativity.

The Golden Mousetrap was awarded to SpaceClaim for SpaceClaim Engineer 2010 ( [http://www.spaceclaim.com/en/company/news/pressreleases/10-08-03/SpaceClaim\\_Extends\\_3D\\_Across\\_Customer\\_Sales\\_and\\_Engineering\\_Teams\\_and\\_Delivers\\_Measurable\\_Bottom-line\\_Benefits.aspx](http://www.spaceclaim.com/en/company/news/pressreleases/10-08-03/SpaceClaim_Extends_3D_Across_Customer_Sales_and_Engineering_Teams_and_Delivers_Measurable_Bottom-line_Benefits.aspx)) (the Company has since released SpaceClaim 2011 ([http://www.spaceclaim.com/en/company/news/pressreleases/11-01-18/SpaceClaim\\_Strengthens\\_3D\\_Direct\\_Modeling\\_for\\_the\\_Enterprise\\_with\\_SpaceClaim\\_2011.aspx](http://www.spaceclaim.com/en/company/news/pressreleases/11-01-18/SpaceClaim_Strengthens_3D_Direct_Modeling_for_the_Enterprise_with_SpaceClaim_2011.aspx)) ), which is designed for engineering organizations who want to move to upfront concept modeling to save time and money, and continue to drive innovation. SpaceClaim 2010 -- the Company's sixth release of its software -- enables engineers to leverage 3D for concept modeling, bid modeling, and model preparation for CAE, simulation and manufacturing.

"The products highlighted in this year's Golden Mousetrap winners and finalists clearly demonstrate both cutting-edge design ideas and the practical evolution of technologies for systems and product design engineers," said Design News Editorial Director David Greenfield. "Design News congratulates all the engineers and their companies who have been recognized with the Golden Mousetrap Award, and we are grateful for their contribution to this year's competition."

"This is a great honor to have SpaceClaim Engineer (<http://www.spaceclaim.com/en/Products/Engineer.aspx>) cited by one of the industry's leading publications," said Chris Randles, President and CEO, SpaceClaim. "SpaceClaim's goal is to empower every engineer to work in 3D without having to be a CAD expert. SpaceClaim is the biggest innovation in 3D in 25 years, enabling engineering teams to quickly develop, explore and validate 3D designs before committing to costly detailing in traditional CAD. Engineering-driven product development with SpaceClaim Engineer shortens time-to-market, supports innovation, and improves customer satisfaction. We thank the judges of Design News for recognizing SpaceClaim Engineer."

The Design News Awards Program has recognized engineering innovation and creativity in product design for more than two decades. This year, Golden Mousetrap awards were given in four major categories: Electronics & Test, Automation & Control, Design Tools: Hardware & Software, and Materials & Assembly. A record number of entries were submitted resulting in 95 finalists and

18 winners.

About Design News  
Design News is the leading technical resource, both in print and online, providing technology news, opinion, analysis, end-user examples and tutorials for engineers and engineering managers who design consumer and industry-specific products and systems that range in application from planes, trains and automobiles to cellular phones, industrial machinery, medical devices, and more.

About SpaceClaim Corporation  
SpaceClaim enables global engineering and manufacturing organizations to leverage 3D design to innovate, win more business, and get products to market faster. Engineers can rapidly create new designs as well as manipulate and simplify 2D and 3D CAD data, regardless of origin and without the complexity of traditional CAD. Customers include Nokia Siemens Networks, Tyco Connectivity, BorgWarner, Medtronic, Lotus Cars, Toyota Motor Corporation, Sharp, LG Electronics, K2 Medical Systems, FuelCell Energy, Emhart Glass, GE Aviation, General Dynamics, and the U.S. Navy. SpaceClaim is privately held and backed by Borealis Ventures, Kodiak Venture Partners, and North Bridge Venture Partners.
