UMC buys equipment for 3D IC manufacturing

I-Micronews

UMC previously revealed that it plans to absorb the 73%-owned subsidiary, which will liquidate, due to cost and other concerns, according a TSE filing issued in February.

In mid-2010, UMC announced that it has forged a three-way tie for the development of 3D IC integration solutions with chip supplier Elpida Memory and Powertech Technology (PTI), which provides assembly and testing services.
