

IMD Announces 35% Increase in Revenues for OMI

Bio-Medicine.Org

TAMPA, Fla., Aug. 2, 2011 /PRNewswire/ -- IMD Companies Inc. announces that when it files its Second Quarter Financial Reports with OTC Markets, LLC, the reports will reflect a 35% increase in revenues for Integrated Medical Diagnostics (Integrated) and Optimum Mobile Imaging (OMI) bringing the year to date revenues of the subsidiaries to \$149,839. Both Integrated and OMI are wholly owned subsidiaries that were purchased by IMD last year to operate the company's diagnostic testing business. Testing operations continue to be performed in several states with OMI mainly concentrated in Arizona, but the companies are working on expanding testing into new markets in the near future. The primary service offered by Integrated is the PCI Heartscan®, which concentrates on the early detection of Cardio Vascular disease and describes blockage in the carotid arteries, while OMI provides mobile imaging services in several modalities to the medical community. The company will file its complete financial reports this month.

"As promised in our open letter to shareholders, the company continues to expand operations and achieve revenue growth in its diagnostic testing arena," stated IMD CEO Saeb Jannoun. "We have been able to create this growth in testing while remaining focused on expansion into the disease prevention and weight-loss industries," Jannoun concluded. Earlier this year IMD announced the acquisition of Positive Solutions Centers, LLC. as a subsidiary to develop and grow their juvenile weight-loss business.
