

Uprizing 2.0: Recall - Undeclared Drug Ingredient: Synthetic Steroid

U.S. Food & Drug Administration

ISSUE: FDA notified the manufacturer that lab analyses found that the product, sold as a testosterone booster, contains superdrol, a synthetic steroid, making it an unapproved new drug. Acute liver injury is known to be a possible harmful effect of using products containing synthetic anabolic steroids. In addition, use of synthetic anabolic steroids may cause other serious long-term adverse health consequences in men, women, and children. These include shrinkage of the testes and male infertility, masculinization of women, breast enlargement in males, short stature in children, a higher predilection to misuse other drugs and alcohol, adverse effects on blood lipid levels, and increased risk of heart attack, stroke, and death.

BACKGROUND: On August 5, FDA made Superior Metabolic Technologies Inc aware that Uprizing 2.0 contains superdrol, which is banned by the FDA. Uprizing 2.0 was distributed through retail health food stores in Alabama, Arizona, California, Georgia, Mississippi, New Jersey, South Carolina, and Texas.

RECOMMENDATION: Consumers who purchased Uprizing 2.0 are urged to return it to the place of purchase.

Healthcare professionals and patients are encouraged to report adverse events or side effects related to the use of these products to the FDA's MedWatch Safety Information and Adverse Event Reporting Program:

- Complete and submit the report Online: www.fda.gov/MedWatch/report.htm [1]
- [Download form](#) [2] or call 1-800-332-1088 to request a reporting form, then complete and return to the address on the pre-addressed form, or submit by fax to 1-800-FDA-0178
