

Boston Scientific gets FDA OK for three defibrillators

Mass High Tech: The Journal of New England Technology

The U.S. Food and Drug Administration has granted a total of three approvals to Natick medical devices company Boston Scientific Corp. for devices targeting treatment of heart failure and sudden cardiac death. The devices - Incepta, Energen and Punctua cardiac resynchronization therapy defibrillators (CRT-Ds) and implantable cardioverter defibrillators (ICDs) - have already seen their first implant with the Incepta ICD at the University of Washington Medical Center in Seattle.
