

## **Elekta Reinforces Strong China-Asia Presence at 2012 ChinaMed Exhibition, Demonstrates Broad Range of Radiotherapy Solutions**

The Associated Press

At the 24th International Medical Instruments & Equipment (ChinaMed) Exhibition, March 23-25 at the China National Convention Center in Beijing, Elekta (booth #3A001) will showcase its comprehensive range of oncology solutions and demonstrate its preeminence as the dominant provider of radiation therapy technology in China.

In the last five years, Elekta has concentrated resources to support China's unprecedented initiatives to modernize and improve access to cancer management technology. This has resulted in a number of firsts and milestones for both Elekta and Chinese medical centers: -- This month, Elekta BMEI shipped its 100th Elekta CompactT treatment system, equipped with the 2,000th Precise Table manufactured by Elekta. The 100th Elekta Compact will be will be shipped to Fujian Province Tumor Hospital.

-- Release of MOSAIQ@ in the Chinese Language, currently in use at Sun Yat-sen University Cancer Center. MOSAIQ is Elekta's dedicated electronic oncology information system.

-- Installation of China's first Leksell Gamma Knife@ PerfexionT radiosurgery systems at Zhejiang University School of Medicine and Beijing Tiantan Hospital. Shanghai Gamma Knife Hospital also plans to install a Perfexion system later this year.

-- First order for Elekta AxesseT, an advanced 4D stereotactic treatment system designed to facilitate highly targeted stereotactic body radiation therapy (SBRT) and radiosurgery anywhere in the body recently was placed.

Elekta also has enabled users of Precise Treatment SystemT in China to increase treatment delivery speed with the release of VMAT (Volumetric Modulated Arc Therapy). VMAT is an advanced radiation therapy technique that delivers treatment in one or more continuous high-speed arcs around the patient, enabling the radiation dose to precisely conform to a tumor by modulating the radiation beam's intensity.

Precise Treatment System is a versatile therapy platform offering treatments with photons or electrons, traditional static delivery, IGRT or VMAT.

"During 2010-2011, Elekta solutions accounted for nearly half of new orders in the Chinese market, making Elekta the number one provider in the country," says Gilbert Wai, Executive Vice President, Asia Pacific. "Our ongoing mission is to help

meet China's demand for comprehensive cancer management solutions as this nation's healthcare providers strive to offer the best services for its citizens." Elekta's comprehensive radiation therapy solutions also will be on display (booth #H1-E36) at the Spring 2012 China International Medical Equipment Fair (CMEF), April 17-20 at the Shenzhen Convention and Exhibition Centre in Shenzhen.
