

Providence Health & Services Inks Deal with Remedy Informatics for Orthopedic and Stroke Registries

The Associated Press

Remedy Informatics, the leading provider of registries for Life Science and Translational research, announced that Renton, Wash.-based Providence Health & Services' has selected Remedy's Mosaic(TM) Platform to implement registries for their Orthopedic Institute and Telestroke Network to improve patient outcomes.

(Logo: <http://photos.prnewswire.com/prnh/20120206/SF47874LOGO>) "We are excited to work with Providence, and to support their efforts to improve the quality of their clinical services and the outcomes they provide their patients," said Gary Kennedy, Founder and CEO of Remedy Informatics. "I am confident that our registry software will enable them to recognize patterns in their clinical practices and identify opportunities to further enhance the quality and effectiveness of their care." Built on Remedy's Mosaic(TM) Platform, these registries will enable Providence researchers to integrate data from many disparate sources and analyze that data with powerful pattern recognition tools. The Mosaic Platform's unsurpassed flexibility will also enable Providence researchers to easily adapt their registries as their research needs evolve over time.

"Continually improving the quality of care is a top priority for us at Providence," said Bonnie W. Smith, executive director, Providence Brain and Spine Institute. "We are making great strides to improve medical outcomes, and improved registry technology will help us achieve our goals and benefit our patients." Providence Health & Services is a not-for-profit healthcare ministry committed to providing for the needs of communities it serves. The Providence system spans five states - Alaska, California, Montana, Oregon and Washington, and includes 27 hospitals, 214 physician clinics, senior services and supportive housing, a health plan and many other health services.

Remedy serves a wide range of leading life science and translational research institutions across the country, including SAIC-Frederick, Inc., the operations contractor for the National Cancer Institute's Frederick, Md. campus, the Cleveland Clinic, the American Joint Replacement Registry, Baylor Health Care System and many more.
