

Neusoft Medical Launches NeuViz 64 Multi-slice CT Scanner at CMEF Spring 2012

The Associated Press

Neusoft Medical Systems Co., Ltd. ("Neusoft Medical"), a wholly-owned subsidiary of Neusoft Corporation, today announced its introduction of NeuViz 64 multi-slice CT scanner into the global market. This device, developed independently by Neusoft Medical, debuted at the 67th China International Medical Equipment Fair (CMEF) Spring 2012.

Currently pending approval from the U.S. Food and Drug Administration, the NeuViz 64 challenges the current paradigm which places the clinical advantages of 64-slice scanning beyond the financial means of all but the largest hospitals and clinics. Neusoft Medical has pioneered the rapid evolution of CT technology in China to meet the global demand for high-quality affordable imaging -- rapidly progressing from a single slice scanner to the release of the NeuViz 64. The launch of the NeuViz 64 CT further demonstrates Neusoft Medical's extensive research, development and manufacturing capacity to introduce technology with unprecedented economic feasibility for healthcare providers around the globe.

The NeuViz 64 is the latest installment in what has been a long line of innovative product offerings from Neusoft. This design is focused on minimizing patient X-ray dose, without compromising image quality.

These design strategies have resulted in a low dose CT system that delivers high patient throughput, is easy to use, performs advanced Cardiac Imaging and provides for a wide variety of clinically relevant post processing and diagnostic techniques.

At the launch ceremony of NeuViz 64 CT, Mr. Jiang Genmiao, Vice President of Neusoft Corporation and President of Neusoft Medical said, "As a medical system supplier focused on software technologies, Neusoft Medical has been driving the trends of China's CT industry by innovatively combining software and product engineering. Neusoft Medical is the only Chinese medical system supplier that can produce CTs, and we are committed to continuous innovation and investment in CT and other new medical products." At present, Neusoft Medical is expanding its global presence by developing sales and service systems in international markets to support imaging products. Neusoft Medical has achieved ISO9001 Quality System Certification for all products, among which, CT, MRI, X-ray, diagnosis ultrasound and PET products have been certified by CE and FDA. The NeuViz 64 complements a full suite of Neusoft Medical CT systems that include the NeuViz Single, NeuViz Dual, and Neuviz 16.

These systems are available in over 60 countries. Neusoft has installed bases in the United States, Italy, Russia, Portugal, India, Eastern Europe, Middle East, South
