

Asher Holzer Retires as President of InspireMD

The Associated Press

InspireMD, Inc. (OTC BB: NSPR) (the "Company" or "InspireMD"), a medical device company focusing on the development and commercialization of its proprietary stent platform technology for use in patients with Acute Myocardial Infarctions, announced that Asher Holzer, Ph.D., president and co-founder of the Company, is retiring as president of the Company.

Dr. Holzer will remain a director of InspireMD and will also provide the Company with consulting services for a period of six months.

About MGuardT Coronary Stent MGuardT combines a coronary stent merged with an embolic protection specifically designed for acute MI patients. The embolic protection is comprised of an ultra-thin polymer micron net that wraps the stent.

The MGuardT stent seeks to provide outstanding and lifelong embolic protection, without affecting deliverability. MGuardT is CE Mark approved. Mesh-based protection is now recommended for use in the recent Guidelines of the Task force of Myocardial Revascularization of the European Society of Cardiology (ESC).

MGuardT is currently being investigated in the multi-center international MASTER (MGuardT for Acute ST Elevation Reperfusion) trial. This study has been designed to evaluate the MGuardT stent compared to commercially-approved BMS or DES products in STEMI patients undergoing primary angioplasty. The trial is fully enrolled and preliminary top line results are expected in the third quarter of 2012. Plans for a registration study in the US are also at an advanced stage.
