

Post-Recession, the Global Market for Surgical Equipment Picks Up Speed, Particularly In China and Emerging Economies

Bio-Medicine.Org

FARMINGTON, Conn., June 7, 2012 [/PRNewswire-iReach/](#) [1] -- Global Information Inc is pleased to announce the availability of two new reports focusing on Surgical equipment and devices.

Surgical Equipment Market (Surgical Sutures, Surgical Hand Instruments and Electrosurgical Devices) - Global forecast, Market Share, size, growth and industry analysis (2010-2017)

Transparency Market Research's new [Surgical Equipment Market](#) [2] global forecast and market analysis confirms faster growth in emerging economies compared to developed economies.

The market for surgical equipment plays a significant role in a number of surgical procedures and interventions, and is heavily influenced by healthcare expenditure, economic growth, and life expectancies. Technological innovations, the transition from metal instruments to plastics, and growing demand for outpatient surgeries shapes the future landscape.

This report offers market size and forecast 2010 - 2017 across three categories: electrosurgical devices (such as lasers, electro-surgery devices, disposables, heavier cutting tools, generators and accessories), hand instruments (including blades, scalpels, clamps and scissors) and wound closure products (such sutures, both non-absorbable and absorbable). It also includes market shares and company profiles of key players.
