

## **CompuMed Contract Extended With Oklahoma Department of Corrections**

The Associated Press

CompuMed, Inc. (PINKSHEETS: CMPD) (), a medical informatics and telemedicine services company, has secured a contract extension to provide its signature CardioGram<sup>®</sup> electrocardiogram (ECG) remote interpretation system and over-read services for the Oklahoma Department of Corrections (OKDOC). CompuMed also signed a new contract for CardioGram<sup>®</sup> ECG remote interpretation and over-read services with the Iowa Department of Corrections.

The OKDOC currently rents 22 CardioGram systems and uses CompuMed's over-read services and ECG supplies as part of the contract. The OKDOC has more than 25,000 prisoners in its system.

Under the terms of the new agreement with the Iowa Department of Corrections (IADOC), CompuMed's CardioGram system will continue to be used for EKG services providing remote cardiac screening on an as needed basis for the IADOC system, which houses more than 8,000 inmates. IADOC owns 10 of CompuMed's CardioGram systems.

Maurizio Vecchione, CompuMed's CEO, said, "Many of our correctional contracts are being renewed. It's a core part of our business and something that sets us apart from other telemedicine companies. Our renewal rate is very high which demonstrates our effectiveness and the skill level of our over-read physicians."

Customers for the company's CardioGram system are typically correctional facilities, ambulatory surgery centers, occupational health clinics, research facilities and physician offices. New markets being targeted are pre-participation athletic screenings for school sports and juvenile justice facilities.

The CardioGram system reduces healthcare costs significantly by providing remote cardiac screening at the point-of-care and reducing unnecessary transports to emergency rooms. However, the most unique and life-saving feature of the CardioGram is the device's over-read capabilities or "The Doctor Inside<sup>™</sup>," which immediately engages one of CompuMed's on-call cardiologists to over-read the computerized interpretation. Cardiologist over-reads can be made available to attending physicians at the point-of-care providing expert interpretations in those situations where the data is ambiguous or difficult to interpret. "The Doctor Inside" is a key element of CompuMed's unique approach to telemedicine and telecardiology.
