

Endologix lands CE Mark for Nellix aneurysm device

Mass Device

Endologix wins CE Mark approval in the European Union for its Nellix device, designed to treat abdominal aortic aneurysms.

[Endologix](#) [1] (NSDQ:[ELGX](#) [2]) said it won CE Mark approval in the European Union for a medical device designed to seal abdominal aortic aneurysms.

The Irvine, Calif.-based firm said EuroZone regulators OK'd the latest version of its Nellix system.

But the nod doesn't mean the device will hit shelves across the pond anytime soon, according to a [press release](#) [3].
