

Medtech Market to Achieve Global Sales of \$440 Billion by 2018

The Associated Press

- EvaluateMedTechT World Preview 2018 Reveals Medtech Sales Growth Rate Forecast to Outperform Global Prescription Drug Market Between 2011 and 2018
EvaluatePharma @ the premier source for life science sector analysis and consensus forecasts, today released its EvaluateMedTechT World Preview 2018 report at the AdvaMed 2012 conference taking place in Boston, October 1-3. EvaluateMedTechT World Preview 2018 provides top insights and analysis from the world's financial markets to forecast the expected performance of the Medical Device and Diagnostic industry between now and 2018.

The medical technology market is forecasted to grow at 4.4 percent per year between 2011 and 2018, to reach \$440 billion, according to the EvaluateMedTechT World Preview 2018. This growth will outpace the global prescription drug market, which is expected to grow 2.5 percent per year between 2011 and 2018.

The in vitro diagnostics sector is expected to be the world's largest medtech segment in 2018, with sales of \$54.5 billion, beating cardiology and diagnostic imaging to the top spot. The fastest growing segment among the top device sectors is neurology, which is set to grow at 6.1 percent per year to \$7.3 billion.

Orthopedics is forecast to be the slowest growing segment, expanding 3.1 percent per year between 2011 and 2018.

"The medtech sector is diverse but tends to have clearer value propositions than the pharmaceutical sector when it comes to convincing payers to part with their cash," said Anthony Raeside, head of research, EvaluatePharma@. "Medtech will continue to benefit from emerging market investments that are lifting standards of care, while cost conscious developed markets will continue to invest in more efficient machines, systems and procedures, which offer less hospital time and better patient outcomes." In addition to assessing the overall growth of the medtech market, EvaluateMedTechT World Preview 2018 also looks at key growth areas, performance of market leaders by segments and the performance of marketed and pipeline products by segments.

-- When it comes to global medtech sales, Johnson & Johnson will hold the top spot as the number one medtech company in 2018, with forecasted global medtech sales of \$37.8 billion representing an 8.6 percent global market share. The company will also remain the top medtech R&D spender in 2018, with R&D expenditure forecast to reach \$2.1 billion.

-- Roche looks to be the clear market leader within the in vitro diagnostics sector in 2018 with sales of \$9.9 billion and an 18 percent market share.

Medtech Market to Achieve Global Sales of \$440 Billion by 2018

Published on Medical Design Technology (<http://www.mdtmag.com>)

- Medtronic will remain the number one cardiology company with global sales of \$10.4 billion in 2018 and a market share of 21 percent.
- Johnson and Johnson's acquisition of Synthes in June 2012 will allow the company to command a 30 percent market share of the Orthopedics market by 2018.
- Medtech M&A deal value slumped 46 percent in the first half of 2012 compared to the first half of 2011. However, investors see potential within the medtech market as the total deal value of medtech venture financing increased by 9 percent to \$1.9 billion in the first half of 2012.
- The number of first time Premarket Approval Applications (PMAs) increased 95 percent to 43 in 2011; 510-K approvals were up 10 percent to 3,145. There have been 24 first time PMA approvals thus far in 2012.
