

Theragenics Launches Galt Centeze™ Centesis Drainage Catheter Line of Products

The Associated Press

BUFORD, Ga.--(BUSINESS WIRE)--Oct 24, 2012--Theragenics Corporation ® (NYSE: TGX), a medical device company serving the surgical products and prostate cancer treatment markets, today announced that Galt Medical (a wholly-owned subsidiary of Theragenics) launched its Centeze™ Centesis Drainage Catheter line. The Centeze™ is a needle and catheter system used to drain and aspirate fluid from the body. Centeze™ will add to the drainage product platform Galt initiated with the Outflow™ all-purpose drainage products launched in 2011. The addressable market in the United States for centesis drainage is estimated to be approximately \$9 million annually.

The Centeze™ product line provides surgeons with an improved device featuring large side ports for improved centesis drainage, with easy insertion and a secure compression fit needle interface for quick advancement to the drainage site. The Centeze™ product line combines sheath technology from Galt and specialty needle technology from NeedleTech Products. Both business units are part of Theragenics' surgical products business segment.

"The launch of the Centeze Centesis Drainage Catheter demonstrates our commitment to continuously expand the product offerings of our surgical products business," said M. Christine Jacobs, Chairman and Chief Executive Officer of Theragenics Corporation. "It is vital that we have a stream of new products, such as the Centeze product line, that allow us to enter new markets and expand our offerings in markets we currently serve. The collaboration between these two subsidiaries of Theragenics is an example of the synergies we are realizing with our complementary businesses." Galt Medical and NeedleTech Products are wholly-owned subsidiaries of Theragenics and, along with CP Medical, comprise Theragenics' surgical products business segment.

Theragenics Corporation (NYSE: TGX) operates two business segments: its surgical products business and its brachytherapy seed business. The surgical products business (www.cpmedical.com, www.galtmedical.com, www.needletech.com) manufactures and distributes wound closure, vascular access, and specialty needle products. Wound closure products include sutures, needles and other surgical products. Vascular access includes introducers, guidewires and related products. Specialty needles include coaxial, biopsy, spinal and disposable veress needles, access trocars, radiofrequency devices, implanters, introducer products, and other needle-based products. The surgical products segment serves a number of markets and applications, including, among other areas, interventional cardiology, interventional radiology, vascular surgery, orthopedics, plastic surgery, dental surgery, urology, veterinary medicine, pain management, endoscopy, and spinal surgery. Theragenics' brachytherapy business manufactures, markets and
