

Toshiba Partnerships Help Facilities Manage Dose

The Associated Press

TUSTIN, Calif.--(BUSINESS WIRE)--Oct 9, 2012--Toshiba America Medical Systems, Inc. announces strategic partnerships with Radimetrics, Inc. and Phoenix Technology Corporation to enhance dose management capabilities and support Toshiba customers through American College of Radiology (ACR) accreditation.

Toshiba now offers Radimetrics eXposure™ software, which automatically captures and calculates patient radiation dose. eXposure integrates seamlessly with existing PACS/RIS/Imaging Modalities and is customizable to comply with patient safety and regulatory reporting requirements.

Phoenix Technology Corporation partners with Toshiba to provide Toshiba's clients with turnkey physics solutions to the ACR accreditation process. Phoenix Technology Corporation's physicists will aid Toshiba customers by assisting with the facilities' quality assurance program, and provide the required physics testing and support required in order to obtain ACR accreditation.

"Toshiba's new strategic partnerships arm customers with tools and training required to improve CT safety and stay competitive in today's healthcare market," said Satrajit Misra, senior director, CT Business Unit, Toshiba. "Radimetrics and Phoenix Technology Corporation will help customers achieve their short and long-term goals by applying advanced dose management capabilities and helping them earn ACR accreditation." Phoenix Technology Corporation ACR accreditation service support is also available to Toshiba MR customers. Radimetrics is available as an option on new Aquilion CT products.

About Radimetrics Radimetrics provides radiation dose monitoring and management software to hospitals and imaging centers. Radimetrics' flagship product, eXposure™ is a single-system solution for tracking full body, organ-specific and cumulative radiation exposure across all imaging modalities. It provides crucial patient size-adjusted information to improve decision-making among ordering physicians, radiologists, clinical physicists, safety officers, radiology technologists and others in the radiology workflow, and delivers easy-to-understand patient reports. eXposure has powerful data capture and presentation capabilities to support patient safety, regulatory reporting, quality and utilization management initiatives, accreditation, and referrer and patient satisfaction.
