

NuVasive lands Japanese OK for spine fusion implants

Mass Device

Japanese regulatory body approves NuVasive's 2 titanium alloy implants for sale in the world's 2nd largest spine market.

[NuVasive](#) [1] (NSDQ:[NUVA](#) [2]) said it received Japanese approval for its CoRoent large impacted and CoRoent large tapered titanium alloy implants, devices used in posterior spine fusion procedures.

The implants are NuVasive's 1st inter-body fusion cages to be approved in Japan, according to the San Diego-based medical device company.
