

FluoroPharma Medical, Inc. to Present at Noble Financial Conference

The Associated Press

FluoroPharma Medical, Inc. (OTCQB: FPMI), a company specializing in the development of novel diagnostic imaging products that utilize positron emission tomography (PET) technology for the detection and assessment of disease before clinical manifestation, today announced that Thijs Spoor, Chairman & CEO of FluoroPharma Medical, will present at "NINE"; Noble Financial Capital Markets' Ninth Annual Equity Conference at the Hard Rock Hotel in Hollywood, Florida, on Tuesday, January 22nd at 11:00AM Eastern Time in Room 1.

At the time of the presentation, a live audio and high-definition video webcast of Mr. Spoor's presentation can be accessed through the following link: <http://noble.media.site.com/mediasite/Play/df13c1504acd42dfb206711d92c32f511d>

A copy of the presentation materials will be available on the FluoroPharma website at www.fluoropharma.com or through the Noble Financial websites: www.noblefcm.com, or www.nobleresearch.com/NINE/home.htm

FluoroPharma recommends registering at least 10 minutes prior to the start of the presentation to ensure timely access. You will require a Microsoft SilverLight viewer (a free download from the presentation link) to participate. The webcast and presentation will also be archived on the FluoroPharma website for 90 days following the event.

About FluoroPharma Medical

FluoroPharma is a biopharmaceutical company engaged in the discovery and development of proprietary PET imaging products to evaluate cardiac disease at the cellular and molecular levels. The Company has licensed technology from the Massachusetts General Hospital in Boston.

The Company's goal is to enable personalized medicine through precision diagnostics that will help the medical community diagnose disease more accurately at the earliest stages, leading to more effective treatment, management and better patient outcomes.

FluoroPharma's initial focus is the development of breakthrough positron emission tomography (PET) imaging agents and is advancing two products in clinical trials for assessment of acute and chronic forms of coronary disease. These first in class agents have been designed to rapidly target myocardial cells. Other products in development include agents for detection of inflamed atherosclerotic plaque in
