

## **Quest Announces Battery-Powered Mobile Wireless Surgical Video Display Solution**

The Associated Press

Quest International, Inc., a leading supplier of medical imaging display technologies and information technology solutions, today announced the availability of the AlphaView® Battery-Powered Mobile Video Cart. The newly announced wireless HD video, surgical display system features a 32 inch, 2.3 megapixel medical-grade LCD on a heavy-duty battery-powered mobile cart. Under typical operating conditions, the AVC2F4P-CART will power the 32 inch LCD monitor for up to 8 hours between charges.

"Healthcare video applications are rapidly evolving and the introduction of the AlphaView Battery-Powered Mobile Cart allows facilities to adapt to these new demands," said Shawn Arshadi, President and Chief Executive Officer of Quest International. "Until now, surgical displays were typically mounted to booms or towers. With the AlphaView Battery-Powered Mobile Cart that valuable asset is now able to move where it's needed, when it's needed," Arshadi continued.

The AlphaView mobile video system ships complete with a medical-grade 32 inch HD LCD, heavy-duty rolling cart, foot pedal controlled height adjustable mounting column, 76.8 Ah (Amp-Hour) lithium-ion battery pack and 60GHz HD video receiver and transmitter, allowing picture-perfect wireless reception up to 10 meters from the video source.

The 32 inch (1,920 x 1,080) medical-grade display produces HD images with over 2 million pixels and a 1300:1 contrast ratio, delivering the superb image quality needed in surgical settings.

Other features and advantages of the surgical display include the following: - Bright LCD Full HD resolution (1920 x 1080 full HD) - Clear 1080p artifact-free images - 178 degree viewing angle - Anti-reflective protective overlay - Fully compatible with most HD video camera systems - Liquid drop safe aluminum enclosure (IPX1) - Display is medically certified: UL60601-1, FCC-B, CE, CCC, CAN/CSA, ICES-001, VCCI-B, Medical Class 1 The AlphaView Battery-Powered Mobile Video Cart, AVC2F4P-CART, is currently available for sale with pricing available upon request.

AlphaView offers a complete line of cost effective medical imaging, diagnostic and surgical displays available exclusively through Quest International. For more information on the AlphaView medical display product line, visit [www.alphaviewlcd.com](http://www.alphaviewlcd.com).
