

Weight loss: Smart fork watches how you eat | MassDevice.com On Call

Mass Device

The HAPIfork from HAPILABS watches a user's eating pace to promote better habits through at-time monitoring and online trend tracking.

MASSDEVICE ON CALL — French engineers at HAPILABS last week unveiled their HAPIfork technology at the CES International conference.

The fork is equipped with sensors that monitors a user's eating pace, helping eaters slow down in efforts to reduce bad habits that may be tied to weight gain and digestive problems, Medgadget reported.
