

Patient Safety Advocates Declare War on Preventable Deaths

Mass Device

Masimo's Foundation for Ethics, Innovation & Competition in Healthcare paints a gruesome picture of the impact of medical errors and declares a war on preventable deaths.

Patient monitoring devices maker Masimo this week touted the "great success" of its 1st Patient Safety, Science & Technology Summit, touting a groundswell of support from hospitals and medical technology companies.

Masimo updated its progress toward its stated goal of eliminating preventable deaths by 2020, illustrating the problem with a couple of grim examples.
