

## **MediSwipe Inc. Announces Showcase of "MediScan DMS" and Digital Registry Technology at Treating Health Concerns Expo in Detroit, Michigan on March 22nd-24th**

GlobeNewswire

LOS ANGELES, March 22, 2013 (GLOBE NEWSWIRE) -- MediSwipe Inc. ([1][www.MediSwipe.com](http://www.MediSwipe.com) [2]) (OTCQB:MWIP), a patient security solutions and financial products company for the medicinal marijuana and health care industry, today announced that the company will be showcased and debut its proprietary cloud-based patient registry and health records data management system ("DMS") at the annual Treating Health Concerns Expo in Detroit, Michigan March 22nd-24th. Visitors to the presentation given over the three day event will be able to register as patients or caregivers within the system, apply for new state ID cards and receive a free personal health record managed by the cloud based system for a limited time.

"The MediScan DMS will truly revolutionize the way the medicinal marijuana sector registers new patients for state IDs, and allow caregivers the proper tools to remain compliant and manage their patient data in a HIPAA compliant, secure and readily accessible environment in the cloud. We have created an application that no one within the healthcare sector has yet seen and can be used across all verticals of patient care. I truly believe this application combined with our new state of the art certification centers in Michigan will quickly allow our company to shine and stand out from the crowd as we continue to legitimize this fragmented industry," stated B. Michael Friedman, MediSwipe, CEO.
