

Solta Medical Announces Isolaz 2 Acne System

Bio-Medicine.Org

HAYWARD, Calif., June 3, 2013 /PRNewswire/ -- Solta Medical, Inc. (Nasdaq: [SLTM](#) [1]), the global market leader in aesthetic skin treatments, today announced Isolaz[®] 2, the next generation acne therapy device. Isolaz 2 effectively targets the root causes of acne through a unique, clinically proven combination of vacuum extraction for deep pore purification, broadband light to destroy acne causing bacteria, and a profusion mode to enhance the delivery of topicals into the skin.

"The Isolaz technology is an invaluable tool that sets me apart as a skin specialist; these days, patients want non-systemic and no downtime yet effective acne treatments and Isolaz technology offers all of the above," said Dr. Kenneth Beer, MD., PA., founder of Kenneth Beer MD PA, General, Cosmetic And Surgical Dermatology and voluntary assistant professor at the University of Miami and a consulting associate in the Department of Medicine at Duke University. "The new disposable tips in a variety of sizes offer more options for speed, safety and comfort, expanding treatment area options to include the face, back and chest. With the Isolaz 2 system, physicians can offer safe acne treatments for individual patient needs. I have used the Isolaz technology with great efficacy on many of my patients as well as on my sons."

Isolaz 2 uses Intense Pulsed Light (IPL) therapy combined with vacuum technology clinical proven to safely and effectively treat acne in a three-step process - Cleanse, Purify, Replenish. First, a vacuum removes sebaceous materials to cleanse the pores; second, broadband light purifies by destroying acne-causing bacteria; third, skincare topicals are infused into the skin for a replenishing effect.
