

Minimally Invasive Devices adds another \$2.5M to \$9M fundraising round

Mass Device

Ohio-based Minimally Invasive Devices lands an extra \$2.5 million investment, capping a \$11.5 million fundraising round.

Ohio-based Minimally Invasive Devices capped an \$11.5 million Series B funding round with a final \$2.5 million investment from Radius Ventures, according to a company statement.

MID said it's putting the new cash into marketing and sales for its FDA-cleared device for laparoscopic surgeons, the FloShield vision system.
