

## **Heart Imaging Tech lands NIH grant to build "Corelab of the Future"**

Mass Device

*The National Institutes of Health hand Heart Imaging Technologies a \$2.5 million grant to develop a "Cloud-based Corelab of the Future."*

Durham, N.C.-based Heart Imaging Technologies won a \$2.5 million grant from the National Institutes of Health in support of efforts to build a "corelab of the future."

HeartIT pioneered the WebPAX system, which the company calls the 1st FDA-approved zero-footprint medical imaging workstation. The company also has a substantial footprint in clinical trials, having also won a \$2.5 million NIH grant in 2011.
